

CUSTOMER: **WOODS  
BAGOT™**

PARTNERS:   **Microsoft**

Woods Bagot, a global architecture studio and consultancy founded in Australia, focuses on designing and planning the construction of buildings across a range of functions. With many projects going at any given time, and their workflows being so heavily invested in intricate graphics, Woods Bagot faced a significant challenge in going remote during the COVID-19 pandemic. Nerdio Manager for Enterprise was the powerful, fast, cost-effective solution they needed.

## CUSTOMER SCENARIO

**Graphics-intensive:** With their work being so graphics-heavy, Woods Bagot needed a remote solution that could keep up with their employees' productivity.

**Frequent desktop image adjustments:** They also needed the ability to adjust and replace desktop images quickly and easily.

**Long-term solution:** Woods Bagot saw the shift to a flexible work environment as long-term, and they wanted a solution that would continue to work for them long after Covid-19 ended.

## KEYS TO WINNING

**Power and precision:** Nerdio Manager for Enterprise facilitated exceptional precision when it came to updating their images and graphics.

**AutoCAD compatibility:** Woods Bagot was pleased to discover that Nerdio Manager also enabled them to make changes to AutoCAD and other modeling software.

**Scalability:** Because Nerdio offers Advanced auto-scaling, the customer was able to see it as a long-term solution that would flex with their business and allow them to save a significant amount of money on Azure compute and storage costs.

## CUSTOMER OUTCOMES

**Ease of use:** With Nerdio Manager, Woods Bagot's draftsmen and project managers have constant access to their desktop images and can update or adjust them more easily than having to manage them manually

**Remote solution:** Despite working with very powerful and graphics-intensive programs, Woods Bagot's employees can work from home without a hitch via AVD.

**Cost savings:** Nerdio Manager's auto-scaling functionality is saving Woods Bagot a significant amount of money on their Azure compute and storage costs.

## QUOTES & EXCERPTS

*Despite working with very powerful and graphics-heavy programs, Woods Bagot's employees can work from home without a hitch via AVD.*
